EDUCATION

National Institute of Technology , Jalandhar

B.Tech in Instrumentation & Control Engineering, Minor in Computer Science — GPA: 8.0/10

Punjab, India

2024 – 2028

TECHNICAL SKILLS

Languages: C++, JavaScript, TypeScript, Python, SQL

Frontend: React.js, Tailwind CSS, Redux Toolkit, Framer Motion

Backend: Node.js, Express.js, FastAPI, Socket.io, REST APIs, JWT, RBAC

AI/ML: LangGraph, Agentic AI, RAG, OpenCV, SHAP, Scikit-learn, TensorFlow, Keras

Databases/Cloud: MongoDB, MySQL, Firebase, Redis, AWS S3

Developer Tools: Git, GitHub Actions, Postman, Swagger

Core CS: DSA, DBMS, Operating Systems, OOP, System Design

EXPERIENCE

VaniAgent (Solvea Technologies) 🌐

Mar 2026 – Present

Full-Stack AI Intern

Remote

- Built **LLM-powered EdTech workflows** using custom system prompts, enabling chatbot conversations, multimodal file/image processing, and AI-driven presentation generation for real-time educational assistance.
- Enhanced backend performance using Redis caching, asynchronous scraping pipelines, and scalable architecture improvements, reducing API response latency during concurrent usage.
- Revamped the frontend using **React.js** and **Tailwind CSS**, redesigning UI components and layouts to improve responsiveness, accessibility, and overall user experience.
- Developed an AI voice agent using LLM function-calling pipelines, enabling real-time speech interactions, API execution, and conversational task automation.

Centre for Training and Placement, NIT Jalandhar 🌐

Aug 2025 – Present

Full-Stack Developer

Jalandhar

- Developed a **MERN-based Faculty Dashboard** automating recruitment workflows for **100+ companies**, improving administrative efficiency and placement operations.
- Implemented secure **JWT authentication**, **RBAC-based authorization**, and protected APIs to ensure scalable and role-based access control across the platform.
- Streamlined MongoDB aggregation pipelines, reducing query latency by **80%** and improving dashboard performance for high-volume placement data.
- Enhanced the Admin Portal with workflow automation and UI/UX improvements, streamlining student verification and placement tracking processes.

Xceed - Official NITJ Web Dev Club 🌐

Aug 2025 – Present

Backend Developer

Jalandhar

- Scaled backend registration systems supporting **6,000+ students** with **99.9% uptime** during high-traffic event registrations.
- Designed modular Express.js services and reusable backend controllers supporting concurrent workflows for **6,000+ users**, improving backend scalability and reducing code redundancy.

PROJECTS

SmartDocs | *MERN, OCR, MongoDB GridFS* | 🌐

Jan 2026

- Developed an AI-powered document digitization platform achieving **94% OCR accuracy** using asynchronous OCR processing pipelines with Tesseract.js.
- Implemented scalable **MongoDB GridFS** storage handling **500+ binary assets** with optimized file retrieval workflows.

Trust Guard | *React, FastAPI, Scikit-learn, SHAP* | 🌐

Feb 2026

- Implemented an explainable AI fraud detection system integrating **SHAP visualizations** for transparent anomaly analysis and model interpretability.
- Designed FastAPI-based anomaly detection pipelines improving fraud detection sensitivity by **15%**.

Utkansh | *React, Spline, Framer Motion* | 🌐

Feb 2025

- Built a high-performance 3D cultural fest platform serving **5,000+ users** using React, Spline, and Framer Motion.
- Improved frontend rendering performance through asset compression and lazy loading, achieving a **90+ Lighthouse score**.

ACHIEVEMENTS

- State Representative** for OpenAI Hackathon; SIH internal round shortlisted.
- Secured 11th place** in the MLSC Hackathon at Thapar Institute among 800+ participating teams.
- GSSOC'26 Contributor and Mentor** for AI Agents and Open Track.
