EDUCATION

National Institute of Technology , Jalandhar

B.Tech in Instrumentation & Control Engineering, Minor in Computer Science — GPA: 8.0/10

Punjab, India

2024 – 2028

TECHNICAL SKILLS

Languages: C++, JavaScript, TypeScript, Python, SQL

Backend & Systems: Node.js, Express.js, FastAPI, REST APIs, WebSockets (Socket.io), System Design, Redis

Databases & Cloud: PostgreSQL, Prisma, MongoDB, MySQL, Firebase, AWS EC2, AWS S3, NGINX

Frontend & Tools: React.js, Next.js, Tailwind CSS, Redux Toolkit, Git, GitHub Actions, Postman, Swagger

CS Fundamentals: DSA, DBMS, Operating Systems, OOP, Computer Networks

AI/ML: LangGraph, Agentic AI, RAG, OpenCV, SHAP, Scikit-learn, TensorFlow, Keras

EXPERIENCE

VaniAgent (Solvea Technologies) 🌐

Mar 2026 – Present

SDE Intern

Remote (Bengaluru)

- Built **LLM-powered EdTech workflows** (custom system prompts, multimodal file/image processing, AI-driven presentation generation) and enhanced backend performance via **Redis** caching and asynchronous scraping pipelines, cutting API response latency under concurrent load.
- Built **blog.vani** 🌐 🌐, a full-stack **Next.js 16** (App Router) content platform architected on HubSpot's blog engine, implementing **stateless JWT-based session management** using secure, httpOnly cookies and a **four-tier editorial RBAC** system (Viewer/Author/Editor/Admin) backed by MongoDB/Mongoose.
- Built **app.mopy.co.in** 🌐 using the **MERN stack**, a full-stack ordering platform for office-outlet food delivery covering inventory/stock management, staff management, and integrated payment gateway processing, alongside a companion **Flutter** customer app for order placement; deployed to a Linux VPS using SSH key-based authentication, managing file transfers and server-side configuration for production release.

Centre for Training and Placement, NIT Jalandhar 🌐

Aug 2025 – Present

Full-Stack Developer

Jalandhar

- Developed a **MERN-based Faculty Dashboard** automating recruitment workflows for **100+ companies**, improving administrative efficiency and placement operations.
- Implemented **stateless JWT-based session management** with fine-grained **RBAC** authorization across the platform, and streamlined **MongoDB** aggregation pipelines, cutting query latency by **80%** for high-volume placement data.

Research Intern, IIT Patna 🌐

Dec 2025 – Jan 2026

ML Engineering (Computer Vision)

Patna

- Built a **Brain Tumor MRI Classification** project (**VGG16** transfer learning with a custom classification head) that led to selection for the internship; authored technical documentation and worked on implementing published research papers on **polyp segmentation** under Prof. M. H. Kolekar.

PROJECTS

iT1DXpert | *Express, Prisma, PostgreSQL, React (Vite), Recharts* | 🌐 🌐

Jul – Aug 2026

- Designed a hospital-scoped multi-tenant data-isolation layer – middleware enforcing tenant boundaries at the query level across **18+ relational models** – for a Type 1 diabetes care platform built with an NITJ faculty member and **PGI Chandigarh**, backing a **four-tier RBAC** system (Super Admin, Hospital Admin, Doctor, Patient).
- Built a **React (Vite) + Tailwind** SPA with **Recharts**-based glucose-insulin dashboards, longitudinal health-trend logging, carbohydrate and activity tracking, and real-time alert/appointment modules for doctor-patient coordination.

Code Atlas | *Node.js, Express, LangGraph, RAG, Redis, Gemini API* | 🌐

2026

- Built an **agentic README generator** with a three-agent pipeline (**Researcher** → **Critic** → **Writer**) orchestrated via **LangGraph**, including a self-verification loop between the Critic and Writer agents to catch and correct low-quality output before it reaches the user.
- Ingested repository context via the **GitHub API**, cached intermediate summarization results with **Redis**, and generated **Mermaid.js** architecture diagrams alongside **Gemini**-based repo summarization, with a services layer cleanly separated from the agents and routing layers.

ACHIEVEMENTS

- Solved 400+ LeetCode problems** covering arrays, trees, graphs, and dynamic programming, with consistent DSA practice.
- Secured 11th place** in the MLSC Hackathon at Thapar Institute among 800+ participating teams.
- GSSOC'26 Contributor and Mentor** for AI Agents and Open Track.
